

Project No. LOCL-CGA-19-1
Building Access Control System for All Campuses
Central Georgia Technical College
Questions & Clarifications

November 28, 2018

1. Has the College allocated funding for the Access Control System yet? If so, through which source (budget, CIP, state/federal grant etc.)? **It is funded with our FY19 MR&R funds.**
2. Who is the technical contact and/or project manager for the Access Control System project? **The Facilities Director.**
3. Does the College anticipate any professional or consulting services may be needed to accomplish this effort? (i.e. project planning/oversight, PM, QA, IV&V, staff augmentation, implementation services etc.)? If so, what services does the Department desire and how do they anticipate to procure? **We will manage in house.**
4. When does the College anticipate a solicitation to be released for the Access Control System? **Upon design completion.**
5. Does the College anticipate integrating the Access Control System with a Mass Notification System? **Yes**
6. If so, does the College have a Mass Notification System in place? **Yes – CampusCast, but the system should be compatible with or portable to all mass notification systems.** In not, when does the College plan on acquiring that? **N/A**
7. Are there any other technology needs the College plans on acquiring in the next few years? If so, what are they and what is the time frame in which those will be procured? **Being a technical college, the institution regularly updates/upgrades current technologies and implements new technologies.**
8. Is it the intention of GSFIC to prepare the Access Control requirements and specifications through the “Design Professional Services” portion of this solicitation and then award the supply and installation of the system(s) to one of the five (5) participants of the State of Georgia DOAS CCTV Products, Services and installation Contract number 9999-SPD-SPD0000025-004? If the answer is no, will the GSFIC team be open to addressing the benefits of this procurement approach? **To be determined.**
9. If an architectural / engineering firm (the Design Professional” or DP) bids on the design services portion of this project; is the DP allowed to use one of the five (5) participants of the State of Georgia DOAS Contract to assist in the preparation of the design services portion of the solicitation? If the answer is “yes” would that company then be allowed to bid or negotiate directly for the supply and installation portion of this solicitation? **To be determined.**
10. In section one (1) under project budget the stated (construction) cost limitation (SCL) for the project is estimated to be \$950,000 - \$1,250,000. Does this estimate include the design services of the project? **No, that range does not include design services.**
11. In section 2 Design Professional Requirements the second paragraph mentions that “The project will be constructed by a general contractor to be selected and contracted with separately by the owner.” Does GSFIC intend to have a GC involved or does GSFIC wish to have a Security Systems integrator involved to do the access control system? **To be determined.**

12. In B1 under B Experience and Qualifications. We assume the reference to the “experience with the design of roofing systems” is a typo. **Yes, this is a typo, should be Access Control Systems.**
13. Based on the timing of submission of questions, the subsequent receipt of answers and the depth of information requested for a complete RFQ response, we respectfully request an extension of time for the preparation of the Statement of Qualifications from December 5, 2018 to December 11, 2018. Is this permissible? **Submittal dates will remain as originally published.**
