

DQ1 2020-0175 Q & A

**Will bids be accepted for machines meeting final tier 4 standards that are equipped with a DPF system?**

Bids must meet or exceed specs to be considered responsive. CPW has included the required spec of “Machine shall include a Tier 4 engine system not requiring DEF fluid and that does not have a diesel particulate filter” to cut out maintenance and exceptionally high costs with filters, and DEF fluid systems being involved.

**Is the 100” cab height also an absolute requirement? Will a machine within a few inches of this height requirement be considered?**

Bids must meet or exceed specs to be considered responsive. CPW has included the required spec of “Machine height must be no greater than 100” due to working locations with the machine

**Will a coupler requiring pin removal be considered? If not, which style is preferred?**

Bids must meet or exceed specs to be considered responsive. CPW has included the required spec of “Machine shall include a quick attachment system for buckets and attachments on arm (no having to remove pins for quick attachment system)” for safety and speed of operations.
