**Bid Detail****Description**

**Scope of Services** Assess and evaluate the structural integrity of select structures at the Wastewater Treatment Plant, estimating the remaining useful life and recommending options for rehabilitation, if warranted; Using a combination of invasive and non-invasive techniques inspect the condition and assess the remaining useful life of critical underground process piping within the Wastewater Treatment Plan, making recommendations for rehabilitation and/or replacement, if needed; Inspect and test existing electrical equipment within the Wastewater Treatment Plant, estimating the remaining useful life and recommending options for upgrade and replacement, if warranted, to support current and anticipated future operational needs; Inspect and test existing electrical equipment at select Sewer Pump Stations through the District's collection system, estimating the remaining useful life and recommending options for upgrade and replacement, if warranted, to support current and anticipated future operational needs. Inspect and test existing electrical equipment at select Water Booster Stations and Groundwater Wells through the District's distribution system, estimating the remaining useful life and recommending options for upgrade and replacement, if warranted, to support current and anticipated future operational needs.

**Other Details** To familiarize consultants with the Wastewater Treatment Plant, and to support the consultant's preparation of their Technical Proposal, the District will be hosting site tours from October 12 to October 30. In light of COVID-19, individual site tours will be conducted for proposal teams and will be limited to groups of 6 persons or fewer. Visitors will be required to wear masks, and social distancing protocols will be enforced. These tours are mandatory, and must be scheduled in advance on a first-come, first-served basis depending on the availability of District Staff. Tours of field facilities will not be accommodated during the proposal period.
