2	FREIGHT/DELIVERY OF TIES	512.00000	MI		

Comm Code	Comm Description	Manufacturer	Model #	Manuf Part #
96286	Transportation of Goods and Other Freight Services			

Extended Description

Freight/Delivery of 1600 6"X 8'-6" Railroad Ties delivered to Wendell H. Ford Regional Training Center at 4675 St. Rte. 181 North, Greenville, KY 42345. Bid must be a price per mile as well as a minimum price per load if the total miles will be less than 500. These prices must be inclusive of any additional fees. For evaluation purposes, only the price per mile will be considered; however, the minimum price for deliveries under 500 hundred miles will be included as part of any contract with the successful bidder.

Price per mile: _____ per mile

Minimum price for deliveries under 500 miles _____ (ONLY APPLICABLE IF LESS THAN 500 MILES)

Equipment and labor will be provided by Motive Rail and/or Department of Military Affairs to offload ties at destination location.

Delivery of railroad ties is expected within 4-6 Weeks of contract award, so successful bidder must work with railroad ties supplier. Delivery should be made within 2-3 weeks of receipt of railroad ties. Bidders shall state expected delivery time from receipt of railroad ties as part of their bid. If bidder is submitting bids for both the railroad ties and the delivery, they should itemize their delivery times to include time to have the railroad ties available and time to deliver them.

Number of calendar days for delivery of railroad ties: _____ DAYS after availability of railroad ties from supplier

BRAND - MODEL # BID _____

Bidders who propose alternate brands/specifications should enclose descriptive literature with their bids so that the equality can be verified. Failure to enclose sufficient literature may result in a non-responsive bid. If the brands are not changed, the contract will be written accordingly and the successful bidder shall be required to deliver the brand/specifications stated in the solicitation.

Designed for service with high speed heavy main line traffic as well as yard use where impaired or closed clearances require a low stand.

Ergonomically sound with angled and longer switch stand handle which is designed to reduce back compression and prevent back injuries.

Construction

Since switch stands wear more from vibration and shock than from actual use, all parts are designed for durability and long service life.

Dead center throw operation

Heavier rail sections, longer switch points, and heavier accessories add considerably to the load which must be moved by a hand operated switch stand. The yoke and toggle arrangement of the switch stand allows the operator to have leverage.

Consistent construction so that when spares are needed they will fit.

Weight: 250 lbs - Ships complete with target, latches, and connecting rod.

Delivery within 4-6 Weeks of contract award.
