ADDENDUM NO. 3

**Landfill Gas Recovery
RFP No. 21-P-191F**

TO: All firms interested in providing the required professional services

The purpose of this addendum is to provide the following clarifications, changes, modifications and/or additions to the solicitation documents. This addendum is an integral part of the Solicitation/Contract Documents.

****NOTICE****

- Pre-Proposal Sign-In Sheets

Questions Received:

Question 1: On Page 7, Item #6 of the RFP it states: 6) Loading, hauling, and off-site disposal of any excess leachate, residues, and other excess solid or liquid materials remaining after processing; We are concerned about the lack of availability of long term, off-site disposal options for concentrated leachate residue. The risk of this requirement will eliminate treatment technologies and bidders. Does the County currently have a leachate recirculation permit as part of their Solid Waste Permit?

Response: The County recognizes the challenges the Respondent faces for the disposal of concentrated leachate, especially since the quality of the leachate is not currently known. As discussed in Section 2.5 of the RFP document and depending on the final negotiated provisions of the Agreement, the County is proposing the disposal fee to be negotiated annually. This allows the Contractor to adjust its pricing based on the pricing received from the concentrated leachate disposal facility, provided a change in disposal costs is justified.

Question 2: Would the County consider utilizing leachate recirculation as an acceptable means of on-site residual disposal? We anticipate the volume of residual to be 10% or approximately 4,400 gpd.

Response: No.

Question 3: If not, does the County have a yard waste collection program?

Response: No.

Question 4: Would the County consider utilizing yard waste, fly ash or other material as a bulking agent and landfilling the mixture?

Response: No.

All other terms and conditions remain unchanged.

END OF ADDENDUM NO. 3

Total Pages: 2
