ADDENDUM NO. 5

Landfill Gas Recovery
RFP No. 21-P-191F

TO: All firms interested in providing the required professional services

The purpose of this addendum is to provide the following clarifications, changes, modifications and/or additions to the solicitation documents. This addendum is an integral part of the Solicitation/Contract Documents.

****NOTICE****

Questions Received:

Question 1: Can you please confirm your answers in Addendum No. 4 are correct in questions #7&10 that the disposal cost for transportation and disposal is \$11 / 1000 gallons. This comes out to \$0.011/gallon and would not make sense to be looking at a leachate evaporator unless this option of disposal is going away.

Response: The answers to Questions 7, 10, and 11 provided in Addendum No. 4 have been revised to the following:

Question 7: What are your historical leachate disposal costs including transportation and disposal at the Jacksonville WWTP?

Response: The County has paid for some time and continues to pay approximately \$0.11 per gallon for the removal and disposal of leachate.

Question 10: What is the current cost for leachate transportation on a per gallon basis to the disposal location?

Response: The County is currently paying a combined cost of \$0.11 per gallon to a private hauling company for the loading, hauling, and disposal of leachate at the Jacksonville facility.

Question 11: What is the current cost of leachate disposal on a per gallon basis at the disposal location?

Response: The County is currently paying a combined cost of \$0.11 per gallon to a private hauling company for the loading, hauling, and disposal of leachate at the Jacksonville facility.

All other terms and conditions remain unchanged.

END OF ADDENDUM NO. 5

Total Pages: 2

If there are any questions, please contact the staff member responsible for this project, Inga Fegley, Senior Procurement Analyst, at phone: (386) 626-6623 or via E-mail: ifegley@volusia.org.

A handwritten signature in blue ink, appearing to read "Shaira Resto", is written over a horizontal line.
