

Business Case Justification for Purchase of 2 Sets of 13,000 GE Historian Version 8.0 Enterprise Tags

The justification for the purchase of 2 sets of 13,000 GE Historian tags is as follows:

The Wastewater Operations (WWO) purchase of 2 additional sets of 13,000 GE Historian version 8.0 Enterprise tags will provide the consistency of the new products with the existing 2 sets of 20,000 GE Historian version 8.0 Enterprise tags products on the existing two (2) Historian servers (each server will have a total of 33,000 GE Historian version 8.0 Enterprise tags products) throughout the Waste Water Treatment Plants (WWTPs) as well as their compatibility with the SCADA system to maintain the critical 24/7 operations of the SCADA system in the WWTPS, the WWO Control Center at Groveway and the Disaster Recovery Center (DRC).

Specifications of 2 sets of 13,000 GE Historian Version 8.0 Enterprise tags:
