

**Request for Qualifications,
Professional Consulting Services for 30th Street Resurfacing between 5th to
18th Avenues (Job Number 2831)**

The City of Rock Island's Public Works Department is soliciting qualifications from firms interested in providing phase I and II services towards execution of a construction contract programmed for early 2025. The 30th Street resurfacing project will be utilizing funds from the Surface Transportation Block Grant (STBG) program. Resurfacing on 30th Street is proposed between the area just south of the 5th Avenue intersection up to and including the 18th Avenue intersection. Water main construction and coordination of construction permits with Illinois Environmental Protection Agency (IEPA) will be needed between 5th to 7th Avenues. The 18th Avenue intersection will require new signalization and turning lane improvements with a potential need to increase right-of-way. Guidelines provided by the Illinois Department of Transportation (IDOT) will be utilized in the project development. The selected consultant will be required to provide a topographic survey of the project area.

In order to be considered, the firm must show expertise with similar STBG, IEPA, and IDOT projects.

The statement should include a list of similar projects, a list of personnel who will be involved in the project along with their relevant experience in this work. In addition, a list of references, a proposed scope of services to include availability for public meetings, current workload, and a timeline for contract execution should be included. In order to minimize the volume of information, please limit your submittal to the items listed.

If you are interested in providing consulting services for this project, please submit four (4) copies of your qualifications to the office of the City Engineer, 1309 Mill Street, Rock Island, Illinois 61201, on or before 5:00 p.m., Tuesday, February 15, 2022. A selection committee consisting of Public Works staff members will review the statements for selection.

Michael J. Kane, P.E.,
City Engineer
